

NAME: _____

Purpose

To understand that a fraction tells how much a part is compared to the whole

Math Words

equivalent fractions

Two fractions are equivalent if they are the same amount.

$$\frac{1}{2} = \frac{2}{4}$$

halves

We say one half for $\frac{1}{2}$ and three halves for $\frac{3}{2}$.

thirds

We say one third for $\frac{1}{3}$ and two thirds for $\frac{2}{3}$.

fourths

We say one fourth for $\frac{1}{4}$ and three fourths for $\frac{3}{4}$.

Starter Problem

Write two equivalent fractions that tell what part of the picture is shaded. Write each fraction in symbols and words.

NAME: _____

Starter Problem

Write two equivalent fractions that tell what part of the picture is shaded. Write each fraction in symbols and words.

Student Thinking

Teresa

I can see it's 2 equal parts out of 6 equal parts. That's $\frac{2}{6}$. If I slide the 2 shaded pieces together, I can see that two sixths is equal to one third of the whole rectangle.

Symbols

$$\frac{2}{6} = \frac{1}{3}$$

Words

Two sixths is equal to one third

Juan

It's 2 parts shaded and 4 parts not shaded, so it's $\frac{2}{4}$. That's the same as $\frac{1}{2}$.

Pitfall

$$\frac{2}{4} = \frac{1}{2}$$

Things to Remember

- * _____
- * _____

NAME: _____

Our Turn

Write two fractions for the shaded part of the picture. Write each fraction in symbols and in words.

1.

Symbols

NAME: _____

Multiple Choice Mini Lesson

Fill in the circle next to the answer you choose.

1. What fraction of the picture is shaded?

☐ $\frac{2}{5}$ ☐ $\frac{4}{6}$ ☐ $\frac{6}{4}$ ☐ not given

2. What fraction of the picture is shaded?

☐ two sixths☐ one fourth☐ one fifth☐ not given
